

## ACCESS CONTROL SYSTEM CARD ACCESS RIGHTS

Access rights managers can modify the rights of each card according to actual needs of each period.

**Master Card:** Has access rights for all locks belonging to the system without time limits restriction, even in case of locks that have the rotary latch safety activated.

**Building Card:** Have access rights for all locks that belong to the building except locks with time limits which they the rotary safety latch activated.

**Floor Card:** Has access rights for all locks that belong to specific building floor apart from the locks that time limits and the rotary safety latch activated.

**Stuff Card:** Has access to all locks that belong to a specific building and floor within specified time limits except locks that have time limits and the rotary safety latch activated.

**Visitor's Card:** Have access rights for a specific room locks for limited amount of time (time limits between arrival and departure.

**Register Card:** Copies the records of a lock and transfers them to the main frame. Each lock keeps stored the last 200 moves. After transferring the records to the main frame computer, they can be processed providing important information especially in critical situations, for example in case of item loss or steal.

## ACCESS CONTROL SYSTEM CARD CHARACTERISTICS

**Card Reliability:** No card damage even after 10,000 continuous insertions to the lock.

**Printable Cards:** The cards are printable and can be even converted into yet another advertising medium. Printing on the cards (apart from silkscreen) can be done electronically ensuring the same look even after prolonged and frequent use.
